

Proposed DofE volunteer footpath project summer 2024

This section of footpath

Proposal to lay stone (e.g. DOT Type 1 Primary limestone) on particularly muddy/waterlogged footpath 365b between 365a and 365 (running south from allotments to Thornhurst Brook Farm).

Sayers Croft can provide volunteer labour in the form of 3x DofE groups consisting 16 young people [16-25] supervised by our groundsman and an instructor. We have all tools and skills required as this is a task regularly undertaken in our nature reserve. We have public liability insurance that would cover the activity.

The Land owner (Nick Grannery) is happy for us to undertake the work and has offered to allow and aid access (removing fence posts etc) where needed. He is keen any materials are natural and sympathetic to the environment.

Previously we have had financial support for the materials from the parish council. We would like to seek this again where possible.
